For Thought Provoking Leadership in Chromatography Purification

A conference that will help stretch possibilities,
be it discovery, development or scaleups!

7th April, 2022; ITC Kohenuur, Hyderabad

Organised by

 **CUSTAGE**
MARKETING SOLUTIONS
a marcom company

Advisory Board

Core competency of the esteemed advisory board will ensure the most relevant content that would benefit attendees. Their deliberations have constantly served as a guiding light to set-up an event that would be most certainly looked up to by the industry.

Katkam Srinivas

Sr. Vice President, Sales & Marketing - API
MSN Group of Companies, Hyderabad

Katkam has worked in areas like peptides and polymers, oncology and other complex APIs. He is skilled at generating USPs for new products, besides method validations, technology transfers, GMP and GLP compliance; he is brilliant at framing regulatory strategies for small and complex products. He was previously with Dr. Reddy's Laboratories in New Product Development for 22 years.

M. Damodharan

Chief Quality Officer & Head
Sai Life Sciences Ltd., Hyderabad

M. Damodharan, holds a doctorate degree in Analytical Chemistry and carries rich experience of 25+ years. Currently associated with Sai Life Sciences as Head - API Global Quality, his prior experience is with Ranbaxy, GSK, Max and Shasun. He is a Board Member at ISPE and an active member in many advisory boards and technical committees.

Rajiv Janjikhel

Executive Director, Alliance Management
AbbVie, New Jersey

Rajiv, with 20+ years' experience in alliance management, business development, project management, product development, third-party sourcing and manufacturing, is currently responsible for global collaborations ranging from start-ups to major pharmaceutical companies. Rajiv has been successful in leveraging business and technical expertise to manage multiple programmes in diverse therapeutic areas, leading to new product approvals.

Muralidharan Chandrakesan

Associate Vice President
Auropeptide Ltd., Hyderabad

C. Muralidharan has close to 3 decades of industrial experience, including over 2 decades in peptide process development and scale up to a commercial scale. He holds a doctorate degree in Biochemistry. He is the inventor of 10 patents in the field of protein and peptides. He is passionate in developing processes for high quality peptide API with competitive manufacturing costs.

Somesh Sharma

Sr. Vice President - Discovery &
Development Solutions; Aragen Life
Sciences, Hyderabad

Somesh is responsible for overall strategy, operations and business growth of discovery chemistry. Prior to joining GVK BIO, he was associated with Jubilant Chemsys Ltd., Nicholas Piramal Research Centre and Ranbaxy Research Laboratories. With over 20 years of experience in discovery and development chemistry, he has several patents and publications to his credit.

Y. S. Lakshmi Narasimham

General Manager - Analytical,
Novel Drug Discovery and Development,
Lupin Ltd. (Research Park), Pune

Lakshmi has over 27 years of experience and is leading the Discovery and Development Analytical Services group at Lupin Research Park, Pune. He has expertise in purification (Achiral and Chiral) and characterisation of small molecules. Initially he was in QC & QA and then moved to CRO and Discovery Analytics in a leadership role.

Manish Chawla

Managing Partner, Custage Marketing
Solutions LLP, Mumbai

Manish comes with over 25 years of experience in offering chromatography solutions relating to purification. His leadership role saw him cater to varied chromatography purification needs. He has been responsible to launch and grow businesses of a number of global brands in India with chromatography solutions.

Get Empowered

The pharmaceutical industry continues to dwell deeper into the growing possibilities for chromatography purification; the conference would touch upon varied aspects of chromatography purification, be it discovery, development or scaleups!

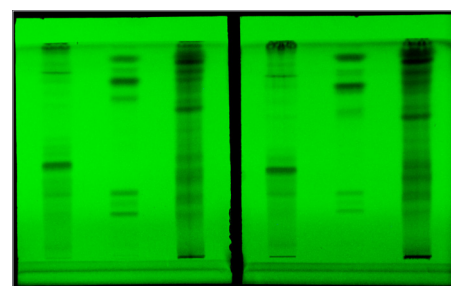

The attendees will get exposed to a myriad of topics that could change the way they work... change the way they purify. New separation techniques and approaches, niche topics, deeper understanding of preparative and process chromatography and allied fields, and upcoming application areas that will provide quality substance to the discerning delegates.

So, if you wish to get that additional gram, which is more pure, in as less a time, with minimal resources...there will surely be something for you at PURIFY'19!

Book your seat today as there is limited seating for this very unique event that the industry is eagerly awaiting...

Why Attend?

The conclave endeavours to touch upon relevant content as from within the framework listed here:

Who Should Attend?

The conclave should be attended by analytical and research chemists, scientists with scale-up and process development knowledge, managers, group heads, natural product purification experts, experts from quality and manufacturing, academicians, policy makers, supply chain heads etc. of this industry as well as associated industries like cosmetics, fragrances and dietary supplements to understand the advancements in chromatography platforms.

Date & Time

Thursday 7th April, 2022 / 9:30 am onwards

Venue

ITC Kohenur, Hyderabad
Knowledge City, Plot No.5, Survey No. 83/1,
Madhapur, Hyderabad, Telangana 500081, India.
